

17271
COPY 1 OF 2

June 28, 1957

George:

STAT The following information concerns receiving data on 24" f/8 lens, item 41 of contract SC 21-54. I believe this information will assist you and [redacted] in identifying and accounting for these lenses. Every 24" f/8 lens manufactured was shipped to Hycon. A minor mixup of serial numbers occurred early during our shipments on these lenses. The billing invoices used consecutive lens serial numbers while the packing (receiving) tickets used the actual lens serial numbers. The total count for each shipment versus invoice was correct but the serial numbers were not. In the attached list, the columns labeled "Invoiced serial number" and "Shipped serial number" furnish the necessary cross-index.

STAT Since the requirement for signed receiving tickets as invoice support was not established until relatively recently I have had Hycon prepare a receiving statement, a copy of which is attached.
